## LOFTS YUNGAY

Lofts Yungay is located on the outskirts of a World Heritage Site in Valparaíso, Chile. For this reason, this apartment building had to relate to its surroundings in a way that wouldn't disturb the architectural heritage. To accomplish this, the existing façade was reconstructed and the building was covered with a corrugated steel coating that is typical for the area. The layout of the apartments echoes classical colonial topology, with all units converging into a central court. The project contains two one-story apartments and 9 three-story lofts. Each unit has an area of about 50 square meters.
